MESSAGE FROM OUR FOUNDER

I say hello to you on behalf of **Viznet Informatics Services**, founded by an entrepreneur who is a "technology lover" as his relatives call him.

In 2003, after graduating from Kocaeli University, Department of Electronics and Communication Engineering, I provided support to Turkey's leading institutions and organizations in the field of network security for 7 years. In this process, I obtained certificates such as Cisco CCNP, Microsoft MCSE and HP ASE and certificates of expertise from leading companies in the sector.

When I realized that this position could not meet the love of technology in me, the first ideas of **Viznet Informatics Services** also emerged. I have been working as the **founder and general manager** of **Viznet Informatics Services** since 2011, when it was established, to provide security solutions in all layers from the end user to cloud solutions, especially in the establishment, securing and monitoring of wired - wireless networks.

We will be delighted to meet you and shape the future "**safely**".
Now is the time to take action for a safe tomorrow.

BEŞİR KAYAR

Founder & General Manager

"Complexity is the main enemy of security."

Niels Ferguson

ABOUT US

Viznet; was established in 2011 to provide security solutions at all layers from the end user to cloud solutions, especially in the establishment, securing and monitoring of wired and wireless networks.

Viznet, with its team of experts, provides integrated solutions that ensure the secure and continuous protection and operation of data in any environment, from end-user network access to cloud access.

Viznet operates in the sector as a system integrator.

Mainly provides projects and maintenance support services to customers

with its expert staff on the network, security and system side.

HOLDER OF ISO9001 QUALITY MANAGEMENT SYSTEM AND ISO27001 INFORMATION SECURITY CERTIFICATION

Viznet Informatics Services, produces solutions for 30+ companies on the ISO 500 | Turkey's 500 Largest Industrial Enterprises list published every year. With its cross-sector experience in different fields such as defense, tourism, telecommunications, public, technology, finance, industry and manufacturing, Viznet has the maneuver to implement applications on hardware and software platforms with different disciplines.

CORPORATE SERVICES

VIZ - PROJECT

We carry out turnkey projects with corporate class and industry standard brands and products in IT security including network security, end user security, SIEM, Sandbox, DLP and continuous vulnerability scanning solutions, network including switching, routing, WAN optimization and all end-to-end network systems, server systems, data storage systems, data backup systems, uninterrupted business continuity, disaster recovery solutions and data management and system projects including big data management (Big Data).

VIZ - SUPPORT

We provide proactive support services to the demands of institutions for professional services and consultancy services as a result of the new generation service understanding with the products and technologies we specialize in.

As **Viznet**, more than 30 companies known and recognized in their sectors and by end users are covered by our professional services with **VizSupport**.

ORCHESTRATION

As Viznet, we handle our projects with the meticulousness of an orchestra conductor who harmoniously manages many instruments at the same time; we manage all complex processes flawlessly.

We produce:

- Outdoor WIFI projects
- Structured Cabling
- Datacenter and Cloud Solutions
- Security Operation Center (SOC) and Penetration tests
- Turnkey projects for ITSM Solutions and more.

ORCHESTRATION / OUTDOOR WIFI PROJECTS

We offer special wifi solutions for difficult environments with high metal density such as ports, mines and shipyards.

Here, we have realized successful projects with RAD and ALTAİ brands in cooperation with Aircom.

We have successfully deployed uninterrupted broadband solutions in harsh environments such as ports, mining operations and shipyards.

ORCHESTRATION / STRUCTURED CABLING

The first factor in the successful operation of network infrastructures is that the cabling infrastructure must be done by experts.

On this side, we have successfully delivered the cabling of domestic and international locations and data centers of many global companies in cooperation with Rota Teknoloji.

ORCHESTRATION / DATACENTER AND CLOUD SOLUTIONS

With the increase in internet speeds, organizations started to throw the backups of their internal systems to the cloud.

At this point, customers started to keep all their systems in the cloud. Seeing the change on this side, we started to develop Viznet data center and cloud solutions 5 years ago. At this point, we established a separate company for these works and continue to offer data center and cloud solutions to existing customers under the roof of RNG Technology.

With RNG, we can provide cloud backup, repliation, colocation, business continuity, disaster recovery solutions to our customers.

ORCHESTRATION / SECURITY OPERATION CENTER (SOC) AND PENETRATION TESTS

We started to provide SOC center service with Fortinet products by combining our experience in network and network security with Metaguard company.

Eren Gözaydın, the founder of Metaguard, is the first Turkish cyber security expert in the top 10 in the world. By blending his and his team's experience with Viznet technical team's experience in network and security, we started to provide SOC services to our customers 24/7 with the support of Fortinet Turkey.

On the Fortinet side, we are the only company that offers Fortisiem product to our customers with MSSP model. We also provide solutions to our customers on penetration tests with TSE certified cyber security experts within Metaguard company.

ORCHESTRATION / ITSM SOLUTIONS

We provide information technology service management solutions by facilitating our customers' compliance with PDPL and GDPR regulations by using the solutions of the Manage Engine product distributed by Vitel.

We also deploy ManageEngine solutions to our customers to bring their security standards in line with 27001.
